

## rescue-tec Holster Gau-Algesheim, material rtx® 950, belt fixation

**Order number:** ID-153

Version of the Holster Frankfurt developed with the Fire Brigade VG Gau-Algesheim.

Together with the fire brigade Gau-Algesheim the holster Frankfurt was extended by two detachable side wedge pockets. These pockets are secured by two neon yellow straps with Velcro. On the outside, the tunnel for door identification strips (optional) is attached with Velcro/fleece. The cover flap of the holster is equipped with the neon yellow lettering of the municipality.

It can be fixed to a normal leather waist belt, on a hip belt, on a fireman's safety belt and on the Molle-system. An emergency release appliance, which releases at a force of 250-300 N, minimises the risk of getting stuck.

- flame resistant material, tested in a 6-burner test at 950 ( $\pm$  50 °C) like respiratory protection full-face masks class 3
- emergency release appliance
- the mobility of the wearer is not inadmissible restricted
- the physical burden on the wearer is not increased disproportionately
- the protective function of other PPE is not endangered

material: rtx® 950

Dimensions: 15 x 17 x 9 cm

meets the following requirements of DIN 14922:2020-02 (Multi purpose bag for fire service use):

- 6.1.1 limited flame spread
- 6.1.3 tensile strenght
- 6.1.4 tear strength
- 6.2 closure system
- 6.3.2 emergency release device
- 10 Instructions for use
