

rescue-tec Holster Neu-Isenburg, for Escape Hood and additional Equipment

Order number: ID-4

Version of the Holster Escape Hood XL (HO-01065) developed with the Fire Brigade Neu-Isenburg with additional shelves for equipment and duplex closure with emergency release device according to DIN 14922

In several tests with breathing protection and in training container together with the fire department Neu-Isenburg we developed this holster. Important specifications are the material Nomex and the emergency release device. The reflective stripes in red-silver-red shall prevent confusion between the jacket stripes and the holster. Furthermore it is clearly visible if the stuff is equipped with the holster. It has space for one escape hood, five cords to mark the doors, two timber wedges, one knife, and one marking pen.

material: Nomex, darkblue

dimensions: 25 x 21 x 11 cm
