

## rescue-tec Holster Spenge, for Tubular loop, Carabiner and Timber Wedges

**Order number:** ID-41

Version of the holster Duesseldorf (HO-01340) developed with the Fire Brigade Spenge with compartments for timber wedges and door marking ribbons.

All popular sizes (width 25-50 mm, length 80-200 mm) fit in this pouch. The ribbons for door marking are stored in a separate rear wall. These can be individually removed from the outside through eyelets in the lid without opening the holster. There is space for a timber wedge in each of the attached front pockets. To protect against loss, these are protected with a cover flap with a push button.

The holster is made of flame-retardant fabric and can be fixed at belts and the Molle system.

It is also possible to put Ambu Res-Cue masc (EH-05000) in the bag. (without contents)

material: flame retardant, anthrazit

dimensions: 14.5 x 12.5 x 5 cm

weight: 0.22 kg
