

rescue-tec Rope Pouch Hermeskeil, Nomex, up to 100 m rope, shoulder strap fixation

Order number: ID-44

Version of the rope pouch Hochheim (HO-01217) made from Nomex, developed in close cooperation with the Fire Brigade Hermeskeil. It can be attached to the PA and holsters can be adapted.

With the shoulder strap the rope pouch can be carried over the shoulder. There is also the option of attaching the rope pouch to the b.a. with the hook.

Equipment such as a rescue knife, scissors Cologne, a belt sling with a carabiner, a timber wedge as well as a marking pencil (in additional slots) are quickly available in the front compartment.

Even with zero visibility, things are close at hand! The rope can be fastened on the inside of the pouch with a carabiner. The opening, which can be shut tight, makes it possible to prevent the rope running out in an uncontrolled way.

To take along additional operational equipment, the rope pouch can be expanded with holsters using the existing adapter system. (without content)
