

## **rescue-tec Rope Pouch Bremerhaven, up to 100 m rope, with Hook for b.a.**

**Order number:** ID-56

Version of the rope pouch with hook for b.a. (HO-01215) made from Cordura red, developed in close cooperation with the Fire Brigade Bremerhaven.

For 30 m rescue rope (DIN 14920) or up to 100 m guide rope.

This rope pouch for capturing fragments can be fastened to nearly every breathing apparatus. It is hooked with one hook to the top retention belt of the breathing air cylinder and fastened using a rubber band over the cylinder valve. The pouch can be hooked off using a handle (pulled upwards) and removed.

The rope can be fastened on the inside of the pouch with a carabiner. This way, when using this as a means to secure a return route, a secure connection is assured. The escape opening on the underside, which can be shut tight, makes it possible to prevent the rope running out in an uncontrolled way.

The rope pouch is made of red Cordura with the aim of visually clearly separating the rope pouches of different fillings via the colour of the bag (black and red).

(without content)

material: Cordura, red  
dimensions: 40 cm x Ø 14 cm  
weight: 0.39 kg
