

rescue-tec Holster Seligenstadt, for rescue knife, belt fixation crosswise

Order number: ID-70

Version of the Holster Kleinwalstertal (HO-01110) developed for the fire brigade Seligenstadt with fixation on the lap belt.

With only one move to the side it can be opened and the rescue knife is ready to hand. The safety strap (not included) protects against loss if the knife slips out of your hand in the hustle and bustle of a respiratory protection emergency. The duplex fastener is suitable for belts / lap belts up to 38 mm wide.

The loops for the wooden wedge and marking pen were deliberately omitted in favor of the holster size.

material: Cordura

dimensions: 13.5 x 5.5 x 4 cm

weight: 0.05 kg
