

rescue-tec Clothing Bag HuPF Vienna, with Trolley and extra compartment

Order number: ID-72

This clothing bag with trolley function, specially developed for the professional fire brigade Vienna, was derived from the HuPF clothing bag (TA-03005). It offers space for the complete overwear for firefighting and much more. The bag has a main compartment (31.5 x 35 x 20 cm) for an overcoat and one overpants, as well as an extra hygienic separate boot compartment (for boots up to approx. size 48). Helmet and holding strap as well as a rope pouch are also stored in a separate compartment (31.5 x 35 x 20 cm).

The face-side compartment (30 x 38 x 9 cm) offers space for T-shirt und sweatshirt and can be easily opened and closed thanks to the two-way zipper.

The side pocket (57 x 32 x 5 cm) is printed below the reflective strip with a multicolored picture und the logo of BF Wien. It is also opened and closed with a two-way zipper.

The shoulder strap system rotated by 180° makes it possible to carry the bag as a backpack, with the boot compartment and trolley wheels downwards. If the bag is carried on the two-part carrying handle, the unneeded shoulder straps find space in a pocket. The sturdy and smooth-running rollers combined with the paddle strap handle and the built-in flexible plastic base plate offer a comfortable use of the trolley function.

The bag is closed with a lid flap with two-sided zipper, connected with a handle as well as Velcro and a large plug-in log. The lid patch of the inside helmet compartment is closed with Velcro. The boot compartment accessible from the outside has two parallel zippers, which are connected to a handle. All zipper slides are quipped with the rescue-tec zipper pendant (except lid flap und boot compartment).

The bag can be individually marked with the transparent pocket (14.5 x 10 cm) on the lid an the name tag (7.5 x 3.5 cm) on the inside of the lid.
