

rescue-tec Holster Eschborn, for escape Hood and additional equipment

Order number: ID-77

Version of the Holster for two Escape Hoods (HO-01061) with additional shelves for equipment developed for the Fire Department Eschborn.

The main compartment offers space for two fire escape hoods with outer packaging. In the outside lid compartment there is a belt loop with carabiner place. Additional equipment such as wooden wedges, knives, marking pins, etc. can be stowed in the attached compartments on the front. The compartment for the door marking tapes is designed so that the tapes are pulled out individually without having to open the compartment.

The holster ist carried over the shoulder by means of carrying straps (AS-01140) or attached with a carabiner.

material: Cordura 1000dtex
