

## rescue-tec Holster Darmstadt II, belt fixation

**Order number:** ID-88

In cooperation with the fire brigade Darmstadt developed variant of the Holster Darmstadt (HO-01030).

The belt loop compartment is enlarged and offers space for the 50 mm wide tubular loop (AS-05030). The two-sided wedge compartments are quipped with pull-out loops that ensure easy removal of the wedges, lock the compartments at the top with Velcro and thus protect against loss of wedges. The lid flaps have extended grips and eyelets on the inside to attach elastic safety strap.

The holster can be fixed to couplings, holding and hip belts and the Molle system with the duplex back closure. (excluding content)
