

AWG Turbo-Nozzle 2130, with handle, Storz D-coupling, DIN EN 15182-2, 40/80/130 l/min

Order number: LT-01000

AWG-Turbo-Nozzles meet the standard DIN EN 15 182 for branchpipes. The flow rates can be selected by the adjusting sleeve, and opening and closing by means of the lever. A special feature is the extinguishing power, due to optimal droplet size also at the full range of the 0° to 120° adjustable water-filled spray stream. The AWG-Nozzles have two pointers, a good aid to feel the selected flow rate as well as the type of the stream. With Flash-Over position. Inlet also swiveling under pressure.

dimensions: 265 x 100 x 230 mm

inlet: 25-D

flow rate selection: 40-80-130 l/min

pressure: 6 bar

range of jet effective solid jet: 15/22/27 m

range of jet effective water spray: 5/6/7 m

spray angle max: 120°

weight: 1.5 kg

DIN EN 15 182
