

## AWG Turbo-Nozzle 2400 with handle, Storz B-coupling, DIN EN 15182, 130/235/400 l/min

**Order number:** LT-01028

AWG-Turbo-Nozzles meet the standard DIN EN 15182-1 for branchpipes. The flow rates can be selected by the adjusting sleeve, and opening and closing by means of the lever. A special feature is the extinguishing power, due to optimal droplet size also at the full range of the 0° to 120° adjustable water-filled spray stream. The AWG-Nozzles have two pointers, a good aid to feel the selected flow rate as well as the type of the stream. With Flash-Over position. Inlet also swiveling under pressure.

dimensions: 320 x 126 x 245 mm

inlet: 75-B

flow rate selection: 130/235/400 l/min

pressure: 6 bar

range of jet effective solid jet: 26-32-40 m

range of jet effective water spray: 11-14-16 m

spray angle max: 120°

weight: 2.7 kg

DIN EN 15182-1
