

AWG FIRE-EX Cartridge Adapter, Storz C-coupling

Order number: LT-01055

Fire-Ex Cartridge Adapter with built-in soap cartridge in a refill case. The wetting agent contained in the case dissolve when water passes through and break its surface tension. This facilitates the penetration of the water into porous to low-permeability substances, such as textiles, foam materials, styrofoam, wood, hay, natural or synthetic fibres. Apart from that the foam film created impedes the ingress of oxygen. The effectiveness of the available amount of water is therefore much greater. The wetting agent also has a cleaning effect. Fire-Ex has therefore proved successful for dissolving residual oils from machines, vehicles and traffic surfaces. The soluble solids are mixed with 0,02 % and are non-polluting in accordance with EC recommendations.

- easy to couple between two C-hoses or jet pipe input
- usable at the pressure outlet of the vehicle
- no foam inductor needed and no slaving of canisters
- very cheap procurement and follow-up costs
- non-poisonous, environment neutral, biodegradable, EC safety data sheet 91/155/EWG available

material: Aluminium, wrought alloy, powder-coated, anodised
dimensions: 435 x 100 x 100 mm

inlet: 52-C

outlet: 52-C

admixing rate: 0,02 %

weight incl. cartridge: 3.4 kg
