

rescue-tec Quick Response Bag de Vries, Version Rotterdam, with individual text

Order number: LT-01215I

The quick response bag fills a gap in fire fighting tactics. It allows the emergency squad to operate fast, effectively and water-efficiently. With the combination of a special nozzle and the specific method for laying the hose the first extinguishing attack can be performed quickly and simply!

The version Rotterdam is the quick response bag de Vries' bigger implementation. It is build for one 30m C42-hose or two 15m C42 hoses. The bag has a special shutter aperture, so two 15m hoses can run out without getting caught.

Advantages:

- the hands are free, because the bag is carried over the shoulder
- it contains one 30m C42-hose or two 15 m C42 hoses, which are inserted in a special way
- the hose runs easily
- flap at the bottom can be opened, thus the remaining hose falls out and can be laid out

Studies showed that in case of apartment or vehicle fires the C-hose is completely sufficient to ensure an adequate water supply and a good fogging, provided the suitable nozzle is used.

The bag attached on the outside can accommodate a adapter piece so that the hose can be connected to the usual distributors.

The quick response bag optimizes your operations.

This quick response bag comes with its own labeling request. The front compartment offers enough space (14 x 14 cm) for the vehicle name or the name of the district or both.

material: Cordura 1000D

dimensions: 49 x 51 x 11 cm

weight: 1.4 kg

Please ensure sufficient contrast between bag's basic colour and text!

This is an individual product. It can not be exchanged.
