

## rescue-tec attack unit bag Alzey

**Order number:** LT-01216

Attack squad bag for extensive equipment developed together with the Alzey fire brigade.

The Alzey carry bag contains all the relevant resources for an indoor attack. This eliminates the need to assemble the individual devices from the vehicle and the team has everything they need right at hand.

The bag consists of three large compartments. The main components are the main compartment for a ring hose package (C42 up to 30 m in length) and the pocket for a mobile smoke blocker RSS F 70 (door widths 70-115 cm) or RSS F 80 (door widths 80-140 cm). Between these two compartments is the compartment for the fire ax (DIN 14900 FA) or a splitting hammer. Due to the length of the handle, the ax is only stowed away in the bag at the point of use.

Two attached holsters offer space for accessories such as hose clamps, hose holders, mini coupling keys or door wedges. Alternatively, a repeater radio can be taken in the smaller holster, which then - without being contaminated - remains with the bag in front of the apartment entrance door and supports the radio connection in larger buildings. In addition, a two-row Molle loop strap is sewn on the front. This offers the possibility to attach further components such as holsters. In this way, the bag can be individually adapted to the respective deployment tactics and is ready for future equipment expansions.

In contrast to the conventional hose carrying basket made of aluminum with an additional smoke trap, the carrying bag can be easily transported using a shoulder strap (not included), so that your hands remain free, for example to be able to operate a thermal imaging camera or the radio. Alternatively, the bag can also be carried by the handle. All compartments that can be opened are colour-coded. In addition, the bag has side loops for pulling out of the storage compartment in the vehicle.

Due to its compact dimensions, the bag can be stowed in a standard holder for B-hose carrying baskets in the equipment

room.
