

iconos Hose winder WT, for D, C, B and A hoses

Order number: LT-01321

Easy to transport and quickly dismantle long stretches of hose - even off-road.

- no carrying of tubes that puts strain on the back
- suitable for hose sizes from D to A
- simultaneous drainage and ventilation
- offers space for up to 6 hoses to be transported
- all-terrain
- stable, welded square tube frame, powder-coated
- fixed quiver for two clutch keys
- winding a 20 m B-hose in approx. 30 seconds

height: 1250mm

length: 600mm

transport dimensions: 920 mm (folded)

air-filled tires: 16 x 6.50-8

winding disc: 700 mm diameter made of high-strength plastic
spindle of the winding disc is infinitely adjustable: 30-90°

drawbar height adjustable: 650-850 mm

weight: 45 kg

The WT hose rewinder is a great help, especially when it comes to the very laborious dismantling of long stretches of hose. It makes rolling up, draining and venting as well as collecting the rolled hoses easier. The crank-operated tiltable winding device can roll up D to A hoses single or double without much effort. The wide air-filled tires and the height-adjustable drawbar ensure good handling, even off-road.
