

Easy-Fix Binding System Assembly Device EVO2

Order number: LT-02530

With the Easy-Fix system you can continue to use your conventional DIN pressure couplings (2008 or later) in sizes C/42, C/52 and B/75. The GH EASY-FIX mounting device makes assembly and disassembly even for the inexperienced child's play. In addition, you benefit from the enormous time and cost savings compared to conventional wire binding.

- all GH EASY-FIX components are reusable
- thanks to the retrofit kit, consisting of inner and outer sleeve, existing DIN pressure couplings can be used
- the hose is pressed in a form-fitting manner, no shifting is possible
- the cone-shaped outer sleeve also serves as an edge glider and prevents it from getting caught on obstacles such as ridges, corners and steps
- cost and time saving
- easy to use
- safe installation
