

## AWG Divider C-DDD, ball valve

**Order number:** LT-03043

The divider C-DDD is used to divide the extinguishing water from one line into three hose lines and thus to obtain an optimal supply of extinguishing water. It was specially designed for use in fighting vegetation fires. Due to its small dimensions, it can be stowed in a hose basket C according to DIN 14827.

- light, small and compact
- ball valve shut-off
- optimized for the flow rates of the D hose lines

entrance: Storz 52-C

output: 3x Storz 25-D

max.working pressure: 16 bar

material: aluminum, brass

dimensions: 205 x 235 x 100 mm

weight: 1.6 kg
