

Eschbach smartFIT with RFID, for Storz C52

Order number: LT-80144

The smart embedding system. Practical and innovative.

- perfect gliding function due to conical shape
- considerable time saving when laying the hose in operation
- high material thickness
- considerably higher strength than required by DIN14811
- binding and unbinding also possible at the point of use
- made of high-strength, glass-fiber reinforced plastic
- extreme economy due to saving of accessories and tools for tying in
- binding possible without additional equipment - very simple assembly by means of Allen key
- integrated RFID tags as a basis optional for inventory

material: GRP
