

Bullard TXS TI, yellow

Order number: MG-06000

The Bullard TXS is the low-cost entry into the world of professional fire department thermal imaging cameras.

ABSOLUTE LIGHTWEIGHT

The TXS weighs just 0.75 kg including battery! It is small, fits well in the hand thanks to its compact and ergonomic design and can be easily carried on a self-retractor.

GOOD IMAGE QUALITY

Just press a button and the TXS is immediately ready for use. Thanks to the resolution of 320 x 240 pixels and the 3.5" screen with 30Hz, the TXS provides all the important information for the attack team.

ALWAYS READY FOR ACTION

The replaceable Li-ion battery offers up to six hours of battery life. Thanks to the innovative car charger, two batteries or two WBKs can be charged simultaneously or one battery can be charged at the same time as one WBK. Also available as a stationary version with mains adapter.

BETTER UNDER FIRE

The robust TXS is tough and was developed in cooperation with European fire departments in Switzerland. The thermal imaging camera comes with a 5-year guarantee.
