

Seek Thermal Imaging Camera FirePro 300, resolution 320 x 240, incl. charging station

Order number: MG-08165

The Seek FirePRO 300 thermal imaging camera is a high quality and reliable tool for firefighters, emergency responders and security personnel, designed to provide precise temperature measurements and thermal imaging in demanding environments.

- ideally suited for all BOS emergency services as part of the PPE
- two image modes selectable FIRE (with "TIBasic" and "TIBasic+") and SURVEY
- 4GB internal storage for videos and photos
- integrated LED light
- high image resolution and frame rate for a clear, meaningful image
- robust 2-component housing for a secure grip

Included:

charging cradle
Nylon loop
USB cable

With its advanced infrared technology, the Seek FirePRO 300 delivers detailed thermal images in real time. It offers high resolution and precise measurement accuracy to quickly detect temperature differences even in difficult scenarios. These features enable users to identify heat-related hazards, locate fires and make life-saving decisions.

The ergonomic design of the Seek FirePRO 300 allows for easy handling even under extreme conditions. The FirePRO 300's 90° viewing angle makes aligning the camera as easy as a smartphone. It is shockproof, waterproof and dustproof according to the IP67 standard and can easily be used in high temperatures. The robust housing ensures durability and reliability, even in demanding operating environments.

The Seek FirePRO 300 user interface is designed to be

intuitive and user-friendly. With just a few keystrokes, users can adjust settings and select different color palettes. Additionally, Seek's groundbreaking mixed-gain technology allows firefighters to simultaneously see details in the hottest and coolest areas without freezing and switching modes.

In summary, the Seek FirePRO 300 thermal imaging camera offers a powerful combination of precision, reliability and ease of use. It is an essential tool for anyone working in environments where accurate temperature measurements and thermal imaging are required, whether for firefighting, rescue operations or security monitoring. With the Seek FirePRO 300 you have the certainty that you can keep track of any situation and act quickly.

The USB cable can be used to connect the thermal imaging camera to a 230V or 12V adapter for cigarette lighters. In addition, the USB connection of the charging cable can be cut off and permanently installed in the vehicle using a voltage converter from 12V to 5V.
