

## Spencer Spineboard TANGO, load capacity 150 kg

**Order number:** RD-02003

The Spineboard Tango is designed to meet the needs of adult patients as well as the specific needs of transporting (small) children and babies. The spineboard "Baby Go" is already integrated in the Tango, which is a real advantage in the lack of space on the vehicles, without having to compromise.

The smaller "Baby Go" has four different recesses corresponding to the height of the head to optimally align the airway and keep the spine in a neutral position.

- combines two spineboards in one
- no extra space for a children's spineboard

load capacity: 150 kg

temperature range: -20 to +60 ° C

dimensions: 1830 x 445 x 60 mm

weight: 10 kg
