

## Spencer Spine Board B-BAK PIN

**Order number:** RD-02010

A special B-BAK, very much appreciated by rescue teams, it puts together its famous technical characteristics and a built in system that allows to fix the restraints to the board. The side handles are translucent incorporated elements; they allow you easy buckling-unbuckling operations for a fast and safe anchorage of the patient's restraints with shackle.

With the creation of the spine board B-BAK, Spencer has set a new technology reference level for the industry, providing a spine board that reduces the possibility of contamination during transportation of the patient. High density completely recyclable polyethylene, moulded into a unique, one piece shell.

This technique guarantees the B-BAK the following exclusive characteristics:

- rigidity
- lightness
- resistance to bumps and corrosion
- completely waterproof
- does not absorb liquids
- immune to infiltrations
- easy to clean (water and soap are sufficient)
- totally X-ray compatible (the patient can be removed from the spine board even after carrying out X-rays or CAT scan investigations)

The straps to fix (RD-02025) are not included.

dimensions: 184 x 41 x 5 cm

operating temperature: -20 – +60 °C

load capacity: 180 kg

weight: 6.5 kg

EG 93/42/CEE, UNI EN 1865-1
