

Spencer Spider Straps System for Spine Board

Order number: RD-02030

The Rock straps system allows the complete immobilization of adult or pediatric patients onto Spencer spine boards. Thanks to the diagonal parts, which move on the central belt, it adapts itself with precision to different body builds. Fixation is with velcro. To simplify use, the straps are colour-coded. Completely X-ray compatible. They are made of strong but soft 50 mm nylon tape and are sewn together with special lock stitching techniques.

width: 50 mm
material: nylon tape
weight: 500 g
