

Scoop Stretcher EN 1865

Order number: RD-02040

The scoop stretcher is used to recover people who have been involved in accidents and may have back or spinal injuries. It can be separated down the middle and slid beneath the person who is being carried from both sides. The sturdy aluminum version has been tested up to 150 kg. The catches at the separation points are easy to open and can also withstand heavy loads.

Of course, the scoop stretcher complies with the requirements of EN 1865.
