

## Spencer Anatomic Head Immobilizer TANGO FIX

**Order number:** RD-02055

This head immobilizer is specially designed for the Spineboard Tango, but can also be used with any other spineboard. The fixation is intended for both adult and child rescue and provides optimal fixation of the head even over long, uncomfortable distances.

Tango Fix consists of two sturdy monoblocks made of polyethylene with soft and hypoallergenic rubber inserts, which offer the patient maximum comfort.

The special U-shape of the monoblocks allows the examination of the ears and detection of a possible blood or fluid loss. In addition, better communication with the patient is possible.

The materials used are waterproof and do not absorb blood or other bodily fluids. It is also resistant to chemicals and solvents, allowing for easy cleaning and disinfection.
