

Carrying Sling EN 1865

Order number: RD-02100

Anywhere where lack of space or impassable terrain makes the use of a conventional stretcher impossible, the carrying sling allows injured persons to be transported reliably and safely.

The sturdy nylon fabric with the belt bands sewn around the edges provides load-bearing capacity of up to 150 kg. The surface coating makes the sling water repellent and impermeable to liquids. Eight carrying loops ensure that the sling can be securely held, even wearing gloves. For safe storage and easy transportation it is provided with a robust stand-by bag.

washable
impermeable to fluids
100 % X-ray transparent

material: nylon fabric
dimensions sling: 195 x 80 cm
dimensions bag: 40 x 40 cm
load capacity: 150 kg
weight: 740 g

Meets the requirements EN 1865, DIN 14530 and DIN 14555 loading standards for fire brigade vehicles.
