

Stretcher Cabinet

Order number: RD-02350

With a ground measurement of 20 x 30 cm, it is especially useful in companies or factories where space is at a premium.

Whether first-aid, transport or safety equipment is required, its contents can be easily reached and brought to the scene of the accident quickly. The key is stored along the same lines as a fire alarm system key.

Electrostatically primed and laminated with shock resistant polyurethane. Featuring one door with secure cylinder locks, surrounded by rubber sealing on the outside to prevent the entry of dirt or dust. An emergency key compartment with glass cover is located on the front of the door. (without content)

dimensions: 200 x 30 x 20 cm
