

rescue-tec Emergency Backpack

Order number: RD-07860

The backpack has four outer side pockets (13 x 13 x 5 cm) and a front patch pocket. On the inside of the lid there is a large inner pocket (28 x 27 x 5 cm) with zipper.

The large main compartment offers space for three inside pockets 28 x 14 x 5 cm, which are fixed with Velcro.

The attached front pocket (28 x 27 x 8 cm) has elastic loops of different sizes at the front and back to hold first aid material.

The backpack is made of high-quality Cordura fabric. The fabric is extremely tear-resistant and easy to clean. It has a water-, oil- and dirt-repellent impregnation and dispersion coating. YKK's two-way zippers allow the rucksack to be opened and closed easily and quickly. For better handling, especially when wearing gloves, all sliders are equipped with zipper extensions.

The padded back and the adjustable shoulder straps provide high wearing comfort. An adjustable chest strap and a padded lap strap also increase wearing comfort. The backpack can be carried with the included shoulder strap as well.

A fleece strip on the front allows individual identification by means of a reflective label (150 x 50 mm).

Included in delivery:
