

PAX Modular Bag L, welded, PAX-Tex

Order number: RD-08565

The organisational system
Clear top, easy to disinfect, available in many colours, plus a two-way zipper: With the reinforced Inside Bag you can keep your PAX Bag in order. The Inside Bags have velcro strips on the back and on the bottom, so you can individually position them on the velcro strip of our Emergency Backpacks and Bags. To allow quick opening, we have equipped the smooth-running two-way zipper with handy toggle extensions.

Clear top & clearly labelled
The name "Inside Bag S - reinforced" is perhaps a bit long. A quick glance is enough to capture the essence of the bag. You can label the Inside Bag using the business card compartment in the clear top. In addition, the colour coding ensure clarity. Just enter the desired colour when ordering.

Cleanly reinforced & easy to clean
We are proud of the fact that our clear top bags are reinforced so no dirt can get caught in fabric protrusions or seams. You can easily clean and disinfect your Inside Bag. It is compatible with all common disinfectants.
The reinforced Inside Bags fit into the PAX Backpacks and Bags of the Pro and RRT series. (without content)
