

pak-ex skin cleaning after firefighting, 200 ml

Order number: RD-80156

For effective skin cleaning after firefighting.

pak-ex is a skin cleaning product optimized for use in firefighting operations after contamination with PAK (polycyclic aromatic hydrocarbons).

PAK are particularly formed in the event of incomplete combustion and can only be inadequately removed with conventional products. pak-ex removes more than 96% of PAK. The skin-friendly formulation is free of surfactants and degreasing components to improve the barrier properties not to affect the skin.

- removes over 96% of PAK
- soap-free - without degreasing substances
- skin-friendly and suitable for all skin types
- developed by specialists at the Leibnitz Institute for Polymer Research in Dresden
- can be stored for 24 months

content: 200 ml
