

Bullard lamp adapter set, for Akkulux MHL 10ex, UK4AAex und UK3AACOP

Order number: SA-01665

The Bullard H1500 and H3000 helmet models can be easily retrofitted with additional slots for lamps. The slot extension creates the necessary space. It is simply screwed onto the existing visor and chin strap attachment. This allows lamps to be attached and removed quickly, easily and independently of the visor using an adapter.

The slot extension and all adapter models are approved as accessories for Bullard helmets in accordance with EN443:2008.

The set consists of a slot extension with adapter for lamps and installation instructions. The existing visor and chin strap fastening screws can still be used.

- for Akkulux MHL 10ex, UK4AAex and UK3AACPO
- Mounting on the right or left side of the helmet

EN443:2008
