

3M Comfort Particle Mask, FFP3 with exhalation valve

Order number: SA-03181

Particle masks from 3M ensure a comfortable fit. The filter fleece reduces breathing resistance to a minimum. Thanks to the 3M CoolFlow exhalation valve, heat and moisture build-up in the mask is prevented, increasing wearer acceptance even in warm and humid environments.

- CoolFlow exhalation valve for hardly noticeable breathing resistance
- hygienically individually packed
- foldable
- seal dots on top of mask reduce goggle fogging
- three-part design for high wearing comfort and ideal fit
- adjusts mouth movement when speaking
- use limit is 30 times the limit for particles
- chin strap for easy positioning

protection level: FFP3

version: with valve
