

rössle Submersible Pump KILO, 240 l/min, 220 V, C-coupling, 35 mm grain size

Order number: SO-07200

Efficient wastewater pump from Rössle - for stationary and mobile use.

- stable and compact construction
- incl. float switch
- easy transport thanks to low weight
- ideal for smaller amounts of water and contaminated water

material: Moplen, Noryl and stainless steel

dimensions: 26 x 38 cm

pump capacity: 240 l/min, 14.400 l/h

connection: C-Storz coupling

maximum immersion depth: 5 m

cable length: 10 m

grain size of pump inlet: \varnothing 30 mm

power: 1.000 watt

voltage: 230 V, 50 Hz

insulation: class F and protection IP 68

Weight: 9 kg

The robust rössle dirty water/submersible pumps are ideal in the fight against contaminated water due to their grain passages. Their characteristics make them perfect for various scenarios such as high water, heavy rain or flooding.
