

## **rössle Submersible Pump FLAT-ROSS, 240 l/min, 220 V, C-coupling, 6 mm grain size**

**Order number:** SO-07203

**Efficient submersible pump from Rössle - for stationary and mobile use.**

- stable and compact design
- effective shallow suction down to a low water level of 1-2 mm
- residual water suction
- ideal for smaller water quantities
- can be combined with the fire department suction units of the HYDRA series

Material: cast iron, aluminum, stainless steel, plastic

dimensions: 23 x 32 cm

pump capacity: 240 l/min, 14.400 l/h

connection: C-Storz coupling

maximum immersion depth: 20 m

cable length: 10 m

grain size of pump inlet:  $\varnothing$  6 mm

power: 400 watt

voltage: 230 V, 50 Hz alternating current

insulation: class F and protection IP 68

Connector with bayonet lock

Weight: 11 kg

The robust rössle dirty water/submersible pumps are excellent in the fight against contaminated water due to their grain passages. Their characteristics make them perfect for various scenarios such as high water, heavy rain or flooding.
