CommandCover for Sepura, 300-00389

Order number: SO-08002

Digital radios are usually configured individually within the group, squadron or organization, which makes a direct assignment to the function or squad necessary. This works best via color differentiation. The CommandCover is designed for use with all common radios and is easily attached with one click.

- developed in cooperation with fire departments
- Tool-free installation without interfering with the speaker microphone's functions

Notice:
To match the model number, please look on the back of your remote voice unit.

The Command Cover is not suitable for indoor use. If possible, protect from unnecessary direct sunlight and heat to increase service life.
