

## Signal Whistle, volume up to 120 dB

**Order number:** SO-80355

The Tornado 2000 is an extremely loud signal whistle. With its special design (without a ball), it generates high-frequency tones that penetrate even the greatest background noise, and low-frequency tones that can be heard very far. It is valued as an emergency signal and means of communication during rescue operations.

- waterproof
- volume up to 120 dB
