rescue-tec Holster for rescue-knife S-CUT

Compact holster for emergency rescue knife S-CUT model 501, 701, QE and XC-E. The neon yellow webbing with push button protects the knife from falling out.

It can be fixed to a normal leather waist belt, on a hip belt, on a fireman's safety belt and on the Molle-system.

material: Cordura 1000D

Emergency Rescue Knife S-CUT QE

S-CUT QE is the cheap version in the S-CUT family. This model has an integral blade which is rotatable but not changeable. It can manage cutting even in thicker fabrics and materials. In emergency situations it is a fast way to remove the patient's clothes in order to expose injuries without needing to change the patient's position which could inflict further injury or unnecessary pain.

S-CUT replaces scissors, knives and similar tools. Ordinary fabrics as well as leather belts, zippers and heavy outerwear can be easily cut. All you need is a free edge of the clothes where you can start the cut. It is designed for optimal ergonomics and provides an excellent grip. Using scissors in heavy materials will most often require a lot of effort. The S-CUT is used with a pulling action requiring minimal effort.
