### **rescue-tec fire brigade Multi Purpose Bag Brensbach, acc. to DIN 14922**

A bag with a large pocket for a fire escape hood incl. packaging, two side straps for timber wedges, a pocket for a tubular webbing with a carabiner as well as three inserts for various equipment. The inserts are with pull strap to lift smaller equipment for easier taking out. With the flame-resistant strap with metal carabiners (HO-06220) the bag is carried over the shoulder. The integrated emergency release appliance, which releases at a force of 250-300 N, minimises the risk of getting stuck. (shoulder strap not included)

- flame resistant material, tested in a 6-burner test at 950 ( $\pm$  50 °C) like respiratory protection full-face masks class 3
- emergency release appliance
- the mobility of the wearer is not inadmissible restricted
- the physical burden on the wearer is not increased disproportionately
- the protective function of other PPE is not endangered

material: rtx® 950

certified according to DIN 14922:2020-02

Conformity to DIN 14922 only achieved in connection with the flame-resistant carrying strap (HO-06220).

### **carry strap with metal carabiner**

material para aramid, flame-resistant, variable length up to 150 cm.

### **3D wood wedges**

For securing the return path (in case of one-way opened doors) and to secure windows and doors. Three-dimensional with a draft of 1-25 mm and 20-40 mm.

### **permanent marker**

It is used for marking rooms or doors during fire fighting. The marker serves for signing especially on dark, rough and dirty surfaces.

Partially the pictures show filling samples.
