### rescue-tec evacuation bag with folders

The rescue-tec evacuation bag is used for the clear storage of aids, which in the case of evacuation of big objects such. Hotels, hospitals or nursing homes, are needed. The bag is preferably stored at a meeting / collection point (reception).

Inside, there are five folders which can be equipped with identification vests, doormarking tapes, flashlights, building / escape route plans and checklists.

The folders are arranged clearly in the bag and are assigned by means of color-matched Velcro labels of each department. For the management, a separate vest and flashlight can be stowed in the outer pocket.

### Origin Outdoors LED Flashlight Focus

Powerful and robust torch with 500 lumens. The stepless focus can be easily adjusted by sliding the lamp head back and forth. This allows the light to be either diffused to illuminate a large area or focused on a small area.

- stepless focus
- with wrist strap
- strobe mode and SOS function

**rescue tec door signing cord with stopper**

With the door marking tape, already controlled rooms or areas can be effectively marked without leaving permanent traces on the doors.

**rescue-tec functional vests with lettering**

- closure with two Velcro strips
- two surrounding silver reflective stripes

size: one size

material: 100% polyester

**rescue-tec Velcro labels with lettering**

- with sewn-on Velcro strap for easy attachment to the handle of the folder

material: 100% polyester
