

## rescue-tec Bag Command Service, for radio and organisation equipment

**Order number:** TA-02050

This multifunctional bag was specially designed for leaders, which use their own car to drive to operations. Modular design. It offers space for radio equipment, logbook, waistcoats and accessory.

The open bag can be fixed quickly with the car's seatbelt on the passenger seat. Alternatively, it can be fixed with the shoulder strap available as an accessory. (shoulder strap is laid around the backrest and tightened). A car charging station for radios can be mount on the removable perforated plate. The user can select the position of the radio equipment. Therefor different straps with screws are supplied to fix micros, spare batteries and so on. A rubber pad, which can be cut individual, to protect the radio is also included.

A logbook or organizer (not included) can be fixed in the in the middle part (then the logbook's handle is also used as handle of the bag).

An additional compartment, which is fitted with straps for pens, offers space for handbooks, map material and more.

Two identification waistcoats fit in the outside compartment. The front of the compartment is equipped with a brushed wool ribbon for reflective back labels (e.g. 2 pieces each 380 x 80 mm). (without back label, shoulder strap and contents)
