

rescue-tec mask bag, for respirator and personal clothing

Order number: TA-02270

Holster with carrying strap for a respirator, two glasses cases and personal change of clothes.

The main compartment for a respirator is padded on the sides and the bottom is reinforced with a plastic plate. This protects the mask from damage. The large cover flap with two key locks protects the mask compartment from dirt and has a storage net for a flash hood. In the outer pockets on the left and right there is space for a glasses case that is protected against loss with a strap.

The attached front pocket offers space for your personal change of clothes and a winter cap. The front pocket is closed with a zipper. A see-through pocket is sewn on the front for personalization. On the top there is a 130 x 25 mm fleece strip for attaching a reflective breastplate. The holster can be carried with the shoulder strap or a carabiner.

material: Cordura, 1000 dtex
