

## rescue-tec Backpack PPE, for vegetation fires and USAR operations

**Order number:** TA-02950

The rescue-tec backpack PPE for for vegetation fires and USAR operations is derived from operations in southern Europe. It is used to store and carry PPE and private items.

- Large main compartment for PPE
- two large side pockets
- Padded shoulder straps and back section
- Chest and lap belt
- attached front pocket
- two loops for additional equipment on the side pockets
- Loop straps for carabiner attachment on the main compartment
- robust Cordura fabric

The large main compartment offers enough space for personal protective equipment such as jacket, pants and face and respiratory mask. The two large outside pockets contain additional equipment, such as: E.g. safety glasses, gloves etc. space, but also private things such as. B. a bottle of water, sunscreen, muesli bars, etc... The backpack also offers the option of inserting a hydration bladder.

A fleece for an identification tag is sewn onto the front pocket. A reflective strip on the front and side pockets ensures better visibility. The lap belt and shoulder straps are equipped with loops and D-rings to which additional equipment can be attached.
