

rescue-tec Clothing Bag HuPF with Trolley, for complete outer clothing, boots and helmet

Order number: TA-03008

The rescue-tec clothing bag HuPF, supplemented by a trolley system.

The main compartment of the bag offers space for a fire brigade jacket and trousers. The boots are hygienically stored in a separate boot compartment (for boots up to approx. size 48). The helmet and safety belt as well as the rope pouch are also stored in a separate compartment. A pocket on the side offers space for underwear or other small items.

The integrated, stowable shoulder strap system enables the bag to be carried as a backpack.

The trolley system offers stable, smooth-running wheels and a padded handle. The latest generation of the bag has an extra reinforced base plate, thanks to which sagging is limited to a minimum, even when fully loaded.

A clear pocket on the lid and a name tag on the inside allow the bag to be individually identified. (without content)

- space for the complete outer clothing including boots, helmet, belt, etc.
- can be carried as a backpack, shoulder straps can be stowed away
- extra reinforced base plate
- stable, smooth-running trolley system
- individual labeling possible
