

PAX Racoon - 2019, PAX-Plan

Order number: TA-03033

Great on the outside

The PAX Racoon is the big culture bag for your travels. Highly processed and manufactured from our robust and water-repellent PAX-Plan, it has numerous pockets that create clear storage space and protect your hygiene items during the journey. For easy transport we attached three carrying handles, two on the sides and one on the top of the back. Our zippers with the practical Easy Zip Its extensions ensure that its contents are always well protected and easily accessible at the same time.

Even better on the inside

The inside of the lid convinces with some useful features. The practical hook enables space-saving mounting when travelling. You can even fix your hair and make up in the removable mirror, a detail that particularly delights the ladies. The small zipped compartment offers space for smaller utensils such as medication or dental floss.

The large main compartment offers plenty of space. Even bigger products, such as a travel hair dryer and a hairbrush can easily be accommodated here. In the secret compartment, which extends the entire length of the bag, you can keep your valuables well hidden from prying eyes.

The two side pockets offer additional storage space for other care products or similar items.
