

rescue-tec Clothing bag with helmet pocket, material Codura

Order number: TA-03110

In this bag you can carry the outer clothing for fire fighting. It has a large main compartment and a smaller side compartment. The main compartment offers space for outerwear and a safety belt. The helmet can be accommodated in the side compartment. Alternatively, the bag is also suitable for a change of clothes or sportswear and can also be used in a variety of ways in the private sphere.

The bag can be carried over the shoulder with the divisible handle or the shoulder strap. On the underside, the bag is equipped with plastic feet to protect against dirt. The bag has sufficient ventilation openings on the side. The inner floor can be removed for better cleaning.

incl. shoulder strap
