

## Gully-Stop, Complete Set, quick gully sealing

**Order number:** TH-01000

The Gully-Stop is the ideal quick sealer for emergencies.

The Gully-Stop, which is filled with a mixture of water and a special antifreeze (with higher specific gravity than water) and is made from a mineral oil resistant, coated tarpaulin material, is secured to the wall in the vicinity of gully inlets using a special wall bracket and is simply taken from the wall bracket in an emergency and placed onto the gully. The heavy intrinsic weight provides a reliable seal and prevents the Gully-Stop from floating.

supplied with:

10 l container of antifreeze  
wall bracket.

dimensions gully stop: 70 x 70 cm
