

Spill Bag 15, 15 l capacity

Order number: TH-01020

Spill bags were developed in order to quickly and efficiently collect escaping liquids such as oil, coolants etc. during operations at any time. The decisive advantages of spill bags in comparison to normal emptying trays are the extremely compact dimensions, which saves a considerable amount of space in the vehicle, the self-raising principle and the liquid retention system that is built into this spill bag, which prevents the collected liquids from escaping.

Spill bag 15 is used to collect small quantities of liquid up to 15 litres. The extremely small dimensions of the spill bag allow it to be stowed in vehicles without problems.

- small packing dimensions
- self-sealing, making transportation and the collected liquids safer and problem free
- extremely light weight

material: 0.3 mm thick PE, extremely oil and chemical resistant

dimensions: 100 x 50 x 2 cm

pack size: 55 x 50 x 1 cm

capacity: 15 l

weight: 0.7 kg
