

PIG Water Activated Flood Bags, 10-pack

Order number: TH-01061

The absorbent flat bags swell on contact with water, creating a firm, heavy barrier that quickly stops or diverts flooding.

- light, compact and easy to handle before activation
- highly absorbent
- up to three layers possible, pyramid-shaped higher dam walls are also possible

Note: Not suitable for use with salt water!

Once activated, they remain in this state. This means that the bags cannot be dried and reused.

dimensions: 66 x 38 x 6.4 cm

material cover: Polypropylene

material filler: polymer (SAP)
