

Double-Chamber Hose Flood Barrier, 4 rm, ball valve with C-coupling

Order number: TH-01075

The flood barrier is an effective and universal applicable tool for retention of extinguishing water, hazardous material accidents or building protection against surface water.

The barrier is based on a double-chamber hose made from high-strength polyethylene (diameter 400/200 mm). It is equipped with an integral filling device. Both hose chambers can be filled simultaneous with water.

- immediately ready for use incl. connection pieces
- only 1–3 person needed, depending on the length
- space-saving

connection: ball-valve with C-coupling
material: polyethylene
Ø double-chamber: 400/200 mm
length: 4 m
