

Door Latch Slider 20 mm

Order number: TH-03080

The latch opening slider for the opening of closed but unlocked doors. Insert it in the gap between door and frame; slide it down to the latch and the door opens. It is made out of highly flexible spring steel and is only as thick as 0.8 mm. The slider can be used effectively almost everywhere. It has no sharp edges, and does not cause scratches or other damages on the door or the frame.
